

**VIRGINIA DEPARTMENT OF HEALTH
OFFICE OF DRINKING WATER
FINANCIAL AND CONSTRUCTION ASSISTANCE PROGRAMS (FCAP)**

**INSTRUCTIONS FOR COMPLETION OF
APPLICATION FOR CONSTRUCTION FUNDS**

The following instructions are intended to supplement instructions and explanatory information incorporated into the PROGRAM DESIGN MANUAL and the APPLICATION FOR CONSTRUCTION FUNDS (Application). If you experience problems in completing the Application after reading through these documents, please do not hesitate to contact the following Program staff for direct assistance.

Steve Pellei, Division Director, FCAP, 804/864-7489
Dale Kitchen, Project Supervisor, 540/463-0422, or
Howard Eckstein, Project Officer, 804/864-7507

SECTION A – PROJECT, ORGANIZATIONAL, AND CONTACT INFORMATION

Line 1., Project Name: Record the project title for which you are applying for funding. It should be sufficiently descriptive to identify it clearly and avoid confusion with any other current or future projects (e.g. “Main Street Station WL Replacement & Extension Project (Phase I)”). The name need not include the name of the owner/applicant.

Line 3.a., Name of Applicant: Record the legal owner’s name of the waterworks applying for funding. If this is a regional application, only enter the legal name of the lead applicant.

Line 3.c., Contact Person: Provide the name of person who can provide additional information about the application and their contact info.

Line 3.f., Federal DUNS Number: The Federal government requires that all applicants for Federal grants and cooperative agreements with the exception of individuals other than sole proprietors have a DUNS number. See policy at: http://grants.gov/applicants/applicant_faqs.jsp#17. The System for Award Management (SAM) is a Federal Government owned and operated free web site that consolidates the capabilities in CCR/FedReg, ORCA, and EPLS. The preferred method for registering is via the World Wide Web at: <https://www.sam.gov/portal/public/SAM/>. Note: applicants must be in good standing with the federal government. Applicants who have been debarred or suspended are not eligible for construction funding.

SECTION C – REQUIRED ATTACHMENTS

Provide all necessary attachments and label your attachments with corresponding numbers (i.e. C-1, C-2, etc.). Most applicants use a binder with tabs labeled appropriately.

- Items 10 and 19 may be submitted in PDF format on a CD provided 2 copies of the CD are submitted.
- Items 20 and 21 may also be included in spreadsheet format on the CDs.
- The following are the only items required for a Refinance application – Items: 1, 2, 3, 4, 17, 18, and 19.

SECTION E – PROPOSED FINANCING

Refinance projects can skip Part 1., construction projects can skip Part 2.

Line 1.a., VDH Funding Assistance Needed: Only include SRF eligible items. See Section V. - ELIGIBLE COSTS/ELIGIBLE PROJECTS of the SRF Program Design Manual. Please round to the nearest thousand dollar amount. Actual/final funding amount will be determined after project is bid.

Line 1.c., Total Project Cost: Should equal the total of lines 1.a. and 1.b. and should also agree to Section H – Line 13.

Line 2.d., What will the interest savings be?: To answer this question calculate the net present value of the interest expense for the debt to be refinanced and compare that calculation to the net present value of the interest expense should the debt be refinanced at 3% and at 4% for a 20 year term. Provide supporting documentation as an attachment.

Line 4., Outstanding Debt – Parity: Parity means the liens on the current outstanding debt and the new debt have equal standing, i.e., the lien on the new debt is not junior to the lien on current outstanding debt.

SECTION F – PROJECT ISSUES

Note: To ensure a timely and accurate prioritization of your construction project, it is suggested that you carefully review Section X of the DWSRF Program Design Manual before you complete this section of the Application.

Line 1., Health Issues: Supporting documentation for your responses should include correspondence from the Virginia Department of Health (VDH) citing the health concerns and compliance issues.

Line 2., Median Household Annual Income (MHI): The MHI for Counties and Cities can be obtained from the U. S. Census Bureau web site <http://www.census.gov/did/www/saige/data/interactive/#>

Contact us for additional details on conducting a site specific survey.

Line 3., Regionalization: Non-complying waterworks means a VDH permitted waterworks that is documented to not be in compliance with VDH Waterworks Regulations.

Line 4., Readiness to proceed: For activities included in the New Construction Timeline which have been checked as “No” (meaning not completed), you should take into consideration the time required to procure goods and services in accordance with the Virginia Public Procurement Act, and the time required for the review and approval of the Preliminary Engineering Report (maximum of 45 days if approved by VDH on the first submittal), the Plans and Specifications (maximum of 60 days if approved by VDH on the first submittal) and the Environmental Review (normally requires about 90 days to complete) in order to establish a realistic timeline.

SECTION G – STATISTICAL DATA

Enter the latest user information. This can be current data or information that matches the latest audits.

Line 1., Water Usage and Losses:

The following example is provided to assist you in completing this section of the Application: *“An existing waterworks intends to construct a water line extension to serve an area of poor quality individual home wells. The waterworks currently has 260 total connections comprised of 246 residential connections. The waterworks plans to extend water lines to a new service area and projects 55 new residential connections and 5 new commercial connections with a population of 12 non-resident employees will be added to the existing system. Fifty-three (53) residential and 4 commercial user*

agreements have been obtained to date.” Based on this data; lines 1.a. through 1.e. should be completed as follows:

Line 1.a., Existing number of total connections: **260** and population **780**.

Note: Equals the population of 1.b. (738) plus others, i. e., non-resident commercial employees (42).

Line 1.b., Existing number of residential connections **246** and population **738**.

Note: If the residential population is not known, multiply the number of residential connections by the average number of persons per household. The Planning District Commission is often a good source of information for average persons per household.

Line 1.c., Projected number of residential connections after project **301** and population **903**.

Line 1.d., Projected total connections of the project **60** and population **192**.

Line 1.f., Please provide any documentation, surveys, studies, or spreadsheets which substantiate the water loss percentage of the entire system. If the project is within a single hydraulic area of the system, provide documentation for that area as well.

SECTION H – CONSTRUCTION PROJECT BUDGET INFORMATION

Identify all construction project budget items in this section. Include all those funded by the owner or others and those proposed for VDH funding. The project budget should be adjusted to next year’s dollars or for when construction is to actually begin. Only include costs directly related to the construction of the project. If the cost item does not apply enter “N/A”. Identify all items to be funded by the owner by including the note; “*owner funded*” next to the item. Owner funded items need not meet VDH Program requirements.

All costs reimbursed by VDH are subject to VDH review, approval, and modification. A more detailed cost estimate with supporting documentation may be required and the final funding amount will be set at loan closing.

Line 1., Administrative and Legal Expenses: must be limited to \$10,000 or less each, unless justification is provided. Any amount over this limit will be funded by the owner.

Line 12., Construction Contingencies: This amount is to cover additional SRF eligible construction costs that could not be foreseen prior to construction (e.g. rock, approved change orders). The amount entered must not exceed 5% of the construction costs. Any amounts over this limit will be funded by the owner.

Line 13., Total: The amount entered on this line should agree to Section E – Line 1.c.

SECTION I – FINANCIAL DATA

Line 1. a.- g., Estimated Cost for Proposed Facilities: Amounts entered on these lines should be for the incremental costs for the proposed facilities and not include depreciation expense.

Line 2.a., Net O,M & R (for existing water facilities): Do not include depreciation expense.

Line 2.c., O,M & R for Proposed Facilities: The amount entered on this line should agree to Section I – Line 1.h..

Line 4, Six-Year Cash Flow Analysis for the Proposed Project (Operating Budget): We require that this information be prepared using the VDH **Cash Flow Template** file.

SECTION J – SUSTAINABILITY

All applicants must submit a completed business case for Green Project Reserve (GPR) with their application. To qualify for credit as GPR credit, a waterworks must show that its proposed DWSRF-funded project has significant (not incidental) green benefits. The project must provide green infrastructure, promote water and/or power efficiency, or provide other innovative environmental benefits.

More information on the GPR is available on:

http://water.epa.gov/infrastructure/infrafin/cwdwsrf_index.cfm
